Co-extruded PE

## Good mechanical resistance.

Co-extruded 11 layers flexible material PE-EVOH fit for vacuum or MAP with thermoforming lines.

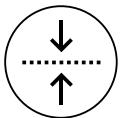

Excellent optical characteristics, medium gas barrier, perfect for deep thermoforming.

High transparency and brilliance.

PE sealing layer.

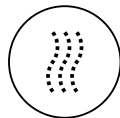

**Application** Vacuum, MAP, pasteurization.

**Packaging Line** Thermoforming line.

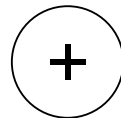

### Thickness

to be defined

### Gas Barrier

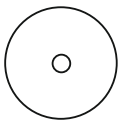

Medium

### Variations

Bottom film for thermoforming

## Available products

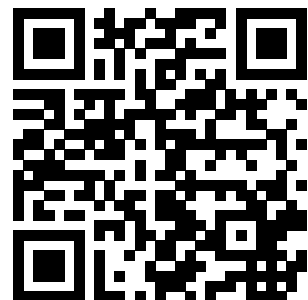

Roll

## PUREPLASTIC

Sustainable, 100% Recyclable

Mono-material packaging solutions (PE, PP, PET)  
easily disposable in the waste sorting.
