PURE♻️PEHB
Laminated BOPE/PE

PUREPEHB

Laminated BOPE/PE

Medium mechanical resistance.

Laminated flexible material BOPE/PE fit for vacuum or MAP, high gas barrier.

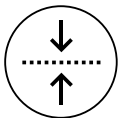

The gas barrier is conferred by the application of a specific glue during the lamination phase and the addition of a lacquer.

Suitable for long shelf-life products.

PE sealing layer.

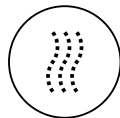

Application Vacuum, MAP, pasteurization.

Packaging Line Chamber vacuum sealer (+ gas injection), flow pack, automatic vertical packaging line, thermo-sealing line as a top film.

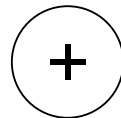

Spessori

80 / 100 micron

Barriera ai gas

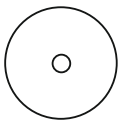

High

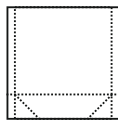

Customized printing,
antifog, pasteurizable,
antistatic, peelable

The more variations are applied to the base product, the less likely it is that the finished product will retain its recyclability status.

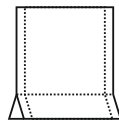

Available products
