Laminated OPA/PP

# Skid

## Laminated OPA/PP

### Good mechanical resistance.

Laminated flexible material OPA/PP fit for vacuum and MAP.

Good optical characteristics: it is mainly employed in automatic and thermosealing packaging lines.

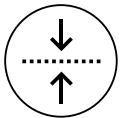

Suitable for heat-processed products including boiling.

High transparency and brilliance.

PP sealing layer.

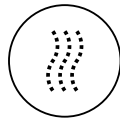

**Application** Vacuum, pasteurization and sterilization.

**Packaging Line** Chamber vacuum sealer, flow pack, automatic vertical packaging line, thermo-forming line as a top film, thermosealing line.
