VIG

Laminated PET+PP

Good mechanical resistance.

Laminated flexible material PET / PP fit for short shelf-life products.
Low gas barrier. Excellent optical and sliding characteristics: it is mainly employed in automatic and thermosealing packaging lines.
Suitable for heat-processed products.
High transparency and brilliance.
PP sealing layer.

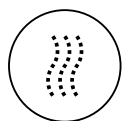

Application No vacuum, no MAP, suitable for pasteurization and sterilization up to 121°C, thermo-sealing.

Packaging Line Thermosealing line.

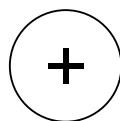

Thickness

65 / 85 micron

Gas Barrier

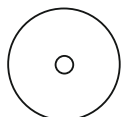

Low
